Re: Round Rock Sports Center – Wood Sports Flooring

Dear Mr. Finnstrom:

High performance and reliability – that is NAH and that is Robbins.
At the Round Rock Sports Center, add in value and you have the most successful sport wood floor built in Texas at the Sports Capital of Texas, Round Rock.

When the City of Round Rock selected Marmon Mok to design the premier multi-purpose youth sports tournament facility to attract the best athletes and the biggest events in Texas, we turned to a trusted partner for a high-performing, economical wood sports floor.

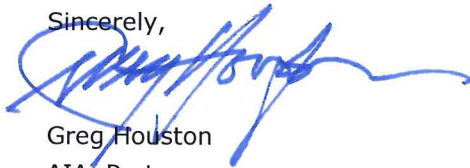

The project had an ambitious schedule and budget and the NAH team worked closely with Marmon Mok and Chasco Construction to quickly identify substrate questions and prepared detailed solutions where two wood floor systems, basketball and aerobics, come together.

Heavy rainfall during construction compromised an area of the wood floor and NAH along with Robbins quickly ran to the rescue to produce new material and re-install in time for the grand opening.

With over 60,000 square feet of DIN certified Bio-Cushion for the multi-purpose gymnasium and over 10,000 square feet of DIN certified Sportwood Plus Ultra Star in the multi-purpose exercise rooms, Robbins and NAH have delivered another project for a very, very, happy Owner and Architect. Our 20 year relationship with Robbins and NAH is built on their ability to deliver a quality floor that will last. We know this Owner will stay happy for years to come.

Congratulations to NAH and Robbins for another outstanding project.

Sincerely,

Greg Houston
