Dear Scott:

In establishing a world leading Athlete Development Centre our leadership team focused on a central mandate around building the strongest partnerships with like minded organizations in order to achieve our mission.

Fortius Sport & Health is an integrated athlete development centre strengthened through philanthropy and focused on optimizing human performance *for life*.

Centaur products play a significant role in the presentation and delivery of the Fortius Athlete Development Centre facility. Fortius clients from professional and elite athletes to young developing athletes and the general public all connect directly with Centaur surfaces, whether in the Gym @ Fortius, in the Training Centre or while rehabbing or benefitting from therapy in the Fortius Institute.

Our partnership with Centaur is a prime example of a strong partnership with tremendous philosophical alignment and a commitment to follow through. From installation through to envisioning how we can better the client experience at Fortius, Centaur has demonstrated a keen interest and delivered innovative concepts to expand our work together in order to have a greater impact on the development of young athletes and furnish the top athletes in the world with the tools and environment required to optimize their performance. Thank you.

Regards,

Lynda Cannell
Chief Operating Officer
