

Robbins 

PLAYING IT SMART BY PLAYING IT SAFE.

“We believe everyone deserves a safe place to play. Which is why we design, deliver, install and maintain some of the safest, smartest, highest-quality sports surfaces in the world. No one understands better than we do about how important your sport surface is to your team and community – and how it can directly impact kids, adults and athletes for decades to come. Here at Robbins, we work with schools and organizations all around the world, prioritizing safety and performance to ensure we provide their athletes with the best shot at winning. We offer a variety of surfaces that enhance performance, speed recovery, and reduce injuries. So if you want your athletes to be performing at their best, you can trust Robbins to build the floors that can make it happen. Just like we’ve been doing since 1894.”

~ The Robbins Team

Athletic surfaces in a league of their own

For over 130 years, Robbins Sports Surfaces is considered a true game-changer in the sports industry. We are the premier supplier of high-quality, high-performance maple and synthetic sports flooring for the professional, collegiate, arena, education, religious, and fitness markets — in over 65 countries around the world.

We continue to lead the way with remarkable new, first-to-market, flooring innovations that are literally changing the way the game is played. From synthetic surfaces to high-performance hardwood floor systems, we have pioneered technological advancements that focus on the sports science “beneath the floor”. Our relentless passion for innovation has earned us more than 25 technical patents to date... and we’re just warming up.

Everything we make is built to last and 100% made in the USA. From the lumber we purchase to our manufacturing facilities in Wisconsin and Michigan, consumers can trust that Robbins produces the highest-quality, American-made flooring in the world.

A 130-YEAR FLOORING TRADITION CONTINUES

1977

Company acquired Robbins Flooring Company, which included plants in White Lake, WI, and Ishpeming, MI — renaming it Robbins, Inc. This acquisition expanded the company's manufacturing capabilities in sports, recreation, and residential flooring.

1992

PULASTIC®
SPORTS FLOORING

Became the exclusive distributor of Pulastic in North America.

Sponsored first bio-mechanical research on sport floors with Dr. Benno Nigg and University of Calgary HPL.

1994

Continuous Strip XL introduced to provide a stronger and higher performing playing surface for the next generation of hardwood sports floors.

2001

Moved portable manufacturing location from Cincinnati, OH to Ishpeming, MI.

2003

Introduced all new Bio-Channel Star® as first vibration-damped, low profile, anchored resilient maple floor system with a Zero G shockpad option.

1995

All-Star Plus® Portable, first resilient portable basketball floor, purchased by NBA World Champion Chicago Bulls.

1998

Introduced Air-Channel Star, an anchored-resilient sports floor system to meet international performance standards.

2005

Introduced MVP flooring system, the world's most bio-mechanically advanced (patented) flooring system which includes research with Dr. Benno Nigg.

2011

Introduced Eclipse & Eclipse SB, an anchored highly resilient flooring system with floating and selfblocking options.

2015

Introduced Bio-Channel SB, a highly resilient self-blocking sports flooring system.

2019

Began manufacturing 2.5" wide flooring and have since sold over 4 million sq ft.

2022

Introduced UniMax100, an innovative and bio-mechanically advanced flooring system created from years of research and feedback from elite basketball programs

2024

Robbins becomes the sole provider of all future NBA portable courts.

1894

Robert A. Stoehr founded Cincinnati Floor Company. Began production of fine parquetry hardwood flooring in downtown Cincinnati.

Stoehr Flooring
Since 1894

1933

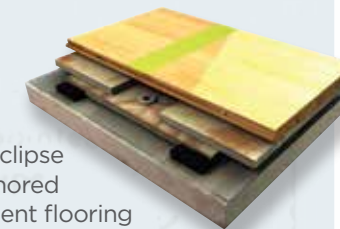

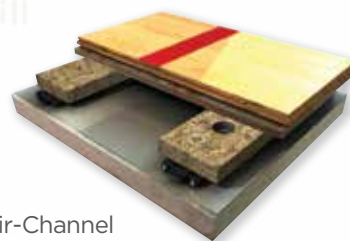

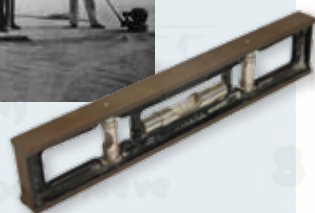

Cincinnati Floor installed 8 1/2 acres of solid teak herringbone pattern at Henry Ford Museum in Dearborn, MI.

1950

All-Star®, is the first portable basketball floor to offer patented "drop-pin" construction.

1991

Introduced Bio-Channel Classic, the first anchored resilient floor and the original work-horse of many Collegiate and NBA Teams.

2021

Introduced new and improved Factory sanded technology.

Robbins Three-Point Play

1 PROVEN SAFETY

Our proprietary floor designs reduce impact to an athlete's joints and muscles to protect their long-term health and career. Almost unanimously, players and coaches report lower fatigue, less stress, faster recovery times, and better performances during practices and games.

2 PROVEN PERFORMANCE

Our profound understanding of the biomechanical interaction between athlete and floor have led to remarkable new design innovations that help improve vibration, deflection and ball bounce. You will quickly realize the increased performance, lower maintenance costs, and enhanced, world-class durability that has made Robbins the choice of champions.

3 PROVEN WINNERS

It's no surprise that 18 of the past 30 NBA championships have been won by teams that play on a Robbins floor. The top basketball programs in the country know the difference a high-quality court can make. When their athletes spend less time icing down aches and pains, their teams can practice longer and perform better.

SOURCEWELL COOPERATIVE PURCHASING

As a proud vendor of Sourcewell Contract Purchasing, Robbins offers Sourcewell members a variety of sports flooring systems through our competitive bid contract that satisfies most local purchasing requirements.

For more information contact a Robbins representative, or to join Sourcewell visit their website at www.sourcewell-mn.gov.

Proud NBA Court Supplier and Manufacturer

Robbins has been chosen to provide all future NBA portable courts, highlighting the NBA's commitment to quality and safety. Trust Robbins for unparalleled craftsmanship and reliability in every game and being the playmakers for the future of the safety of basketball courts.

- Producing all 30 In-Season Tournament courts.
- Manufacturing all future NBA game courts.
- Ensuring top quality and safety as the NBA consolidates court suppliers.

Sustainability... For all seasons

ENVIRONMENTAL COMMITMENT

Reduce. Reuse. Recycle. Rejoice. These are the sustainability principles that guide all of our manufacturing and business practices. We are continually searching for new ways to reduce our environmental impact on the communities where we live and play.

Sustainability and being a good, eco-friendly neighbor are why we have dedicated our lives and livelihood to ensure we utilize the natural world resourcefully and responsibly. From research and design to procurement, distribution and installation, Robbins is committed to conserving natural resources such as lumber and other raw materials, while incorporating recycled materials whenever possible.

Robbins is a longtime member of the United States Green Building Council (USGBC) and Forest Stewardship Council® (FSC®) certified. Look for FSC® certified products available to purchase on most Robbins hardwood flooring systems.

To learn more about our commitment to the environment and our LEED Credit Contributions, please visit us at www.robbinsfloor.com.

Championing our forests

Robbins is deeply involved with sourcing the lumber required to make winning floors. Our experienced timber buyers inspect every lumber site to ensure the harvesting is conducted in a clean and environmentally friendly manner. And creating safe, high-quality, high-performance floors from the forest to the end user is quite the journey.

WASTE NOT, WANT NOT:

- No raw material is wasted during the course of Robbins hardwood manufacturing process.
 - 200 truckloads per year of bark and small chips of wood from the log are collected and used to create electricity.
 - 450 truckloads per year of sawdust and small wood chips are collected to make wood pellets for home heating, animal bedding and food flavoring.
 - 700 truckloads per year of wood waste is converted to steam to provide heat to the lumber kilns and to the buildings during winter.
- Our recycled pads are made from post-industrial and post-consumer sources.

A winning team since 1894

ROBBINS DEALER NETWORK

What makes Robbins so successful? Without question... teamwork. From the founders who built Robbins Sports Surfaces from the ground up to our dedicated team of dealers who have been with us for generations, it's their dedication, commitment, and collaboration that have helped transform our company into the success it is today.

**Like any championship team,
each and every person plays an
instrumental role in winning.**

OUR AUTHORIZED ROBBINS DEALERS:

- Span across six continents and 65 countries around the world.
- Are highly trained, specialty flooring contractors who work side-by-side with us to educate you on the benefits of high-performance sports flooring.
- Are local certified installers who not only ensure your floor is installed to the highest-quality standards, but they'll also provide on-going maintenance to keep your Robbins floor performing like new.

Explore the Versatility of Robbins Hardwood Sports Flooring

Robbins offers a diverse range of maple flooring surface options designed to meet your specific requirements including FSC® certification. Our commitment to quality and innovation ensures that each flooring type delivers exceptional performance, durability, and aesthetic appeal.

MAPLE SPECIFICATIONS

SPECIES	MFMA Northern Hard Maple (Acer Saccharum)
FACE WIDTH	2 1/2" (63mm) 2 1/4" (57mm) or 1 1/2" (38mm)
THICKNESS (Continuous Strip® XL and Random Length)	25/32" (20mm)
THICKNESS (Sportwood®)	7/16" (11mm)

What winners are made of...

MFMA Maple flooring is the industry standard in hardwood sports surfacing due to its durable nature and attractive appearance. Robbins manufactures hardwood maple flooring graded to meet or exceed strict MFMA standards ensuring your athletic facility, studio, or arena has the best quality hardwood surface on the market.

Maple Surface Options

CONTINUOUS STRIP® XL: PREMIUM HARDWOOD FLOORING

The patented end jointing process creates a straighter and more structurally sound surface that installs faster than traditional random length strip maple, with the following available options:

- Advantage XL™ — factory sanded maple eliminates the need for aggressive sanding, resulting in a blemish free finish.
- Boston Square™ — showcases a distinctive and beautiful parquet appearance.
- EZ-XL™ — mitigates the risk of side bonding and panelization when water dispersed finishes are applied.
- XL Plus™ — features a built-in “nub” that accommodates natural expansion and contraction for a more evenly spaced floor.

SPORTWOOD®: MAPLE PARQUET FLOORING

Constructed with solid, edge-grain Northern Hard maple lumber, Sportwood offers superior durability and a unique aesthetic with the following available options:

- Straight Lay — traditional one-direction pattern.
- Boston Square™ — a distinctive and beautiful parquet appearance.

RANDOM LENGTH: COMMODITY BID OPTION

Robbins MFMA commodity strip maple has provided a high-quality, durable, and long-lasting playing surface for the sporting industry, as well as commercial and residential markets.

UNIVERSITY OF MISSOURI

NEW ORLEANS PELICANS PRACTICE FACILITY

MVP™ MAXIMUM VIBRATION PROTECTION

The patented MVP™ is an anchored resilient, factory pre-assembled system that meets and exceeds all industry performance and safety standards. It is unmatched in the industry with regard to biomechanical vibration damping, frequency reduction, and overall uniformity.

MVP™ BENEFITS

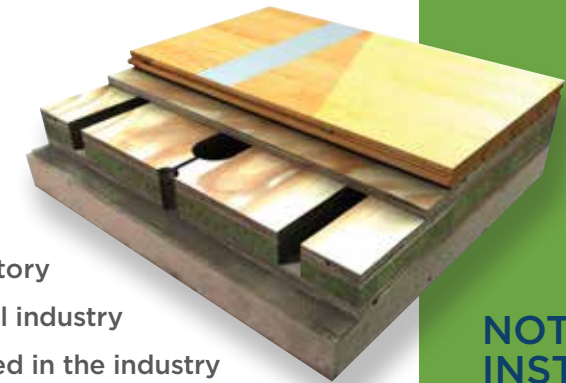

The MVP™ innovative design focuses on optimizing biomechanical interaction between athlete and floor by minimizing vibration and maximizing uniformity, while maintaining proper energy return.

Selected for 10 of the last 12 NBA Training facilities built, demonstrating it is the best floor in the world for the best players in the world.

This unique one-of-a-kind floor system is like no other sports floor design and will take your athletic performance, safety, and comfort to maximum levels.

- San Antonio Spurs Practice Facility
- Vanderbilt University Memorial Gymnasium

“The floor’s performance, as well as Robbins’ commitment to service, is outstanding. Players and officials regularly comment on how solid the floor feels and how well they feel the day after a game. We believe we have the best floor available today.”

Thomas G. Nerl
Athletic Director, Mariemont City Schools

RICE UNIVERSITY

BATAVIA HIGH SCHOOL

LAWRENCE TECHNICAL UNIVERSITY

UC DAVIS

UniMax100®

The innovative UniMax100 floor system is the culmination of years of biomechanical research, feedback from elite basketball programs, and Robbins experience and know-how. Designed to maintain athletes at peak performance, it delivers consistent uniformity, superior biomechanical vibration control, and optimal ball bounce.

UNIMAX100® BENEFITS

Outstanding biomechanical vibration damping properties reduce athlete injuries, fatigue, and lower the risk of lower extremity injuries.

100% floor uniformity is achieved through a seamlessly fused resilient pad and subfloor, eliminating dead spots & ensures a constant and safe playing surface.

No rigid contact or connection exists between the concrete slab and the active layers of the system, mirroring the innovative design principles seen in our MVP™ system.

“The staff believes that Robbins floors are the best available. If they were not superior floors, we would not have installed them in our facilities.”

Karen S. Umlauf

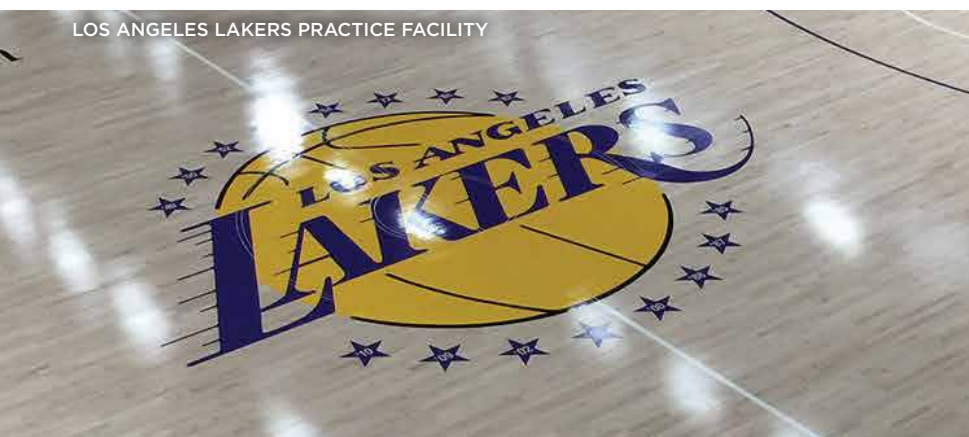

Senior Director, Basketball Administration for the Chicago Bulls

Bio-Channel® Family

Combining the benefits of anchored and floating systems, Bio-Channel® floors have exceptional shock absorption, ball bounce, vibration damping and great load-bearing capacity. Over 30,000,000+ square feet of Bio-Channel® floors have been installed worldwide.

BIO-CHANNEL® BENEFITS

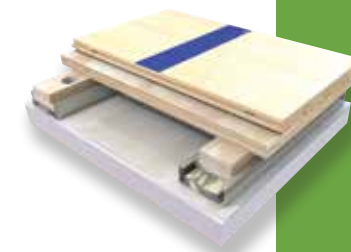

Versatile system designs that meet various industry performance and safety standards.

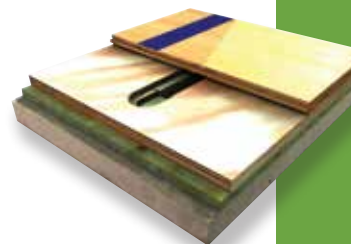

Offers shimmable steel-encased sleepers for uneven slabs, continuous subfloors for uniformity and vibration damping, and low-profile, self-blocking versions designed to handle high weight loads.

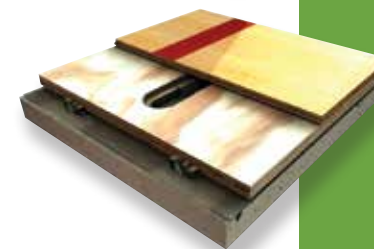

Durable anchored construction results in superior stability and uniformity over time for a longer life span.

All-Star™ PORTABLE FLOOR

All-Star Portable Floors are the preferred choice for both professionals and amateurs worldwide. As a proud supplier and manufacturer of NBA courts, Robbins' portable floors provide an ideal solution for any space where a permanent floor would not be practical. From large multi-use arenas to local civic centers, Robbins' portable floors deliver versatility and performance wherever they are needed.

ALL-STAR™ PORTABLE FLOOR BENEFITS

Optional no loose parts locking system allows floors to go up and down quickly without the need for any pins or bolts.

Optional "Zip" configuration allows more crews to work simultaneously during floor set up and take down for efficient and quick event transitions.

All portable floors are available sanded, painted, and finished to high standards using computer aided graphics and design for outstanding logos and vibrant team branding.

“We go with Robbins because we’re confident their products are sufficiently well researched ... and optimized. They are very professional and very responsive. When, and if, we have an issue, we can count on them to always be responsive...”

Galaxy® Family

The Galaxy® Family offers some of the safest, most durable cardio fitness and weight-room flooring in the industry. Highly customizable and providing cushioned comfort, Galaxy® floor systems hold up to intense use year after year without losing their structural integrity or performance.

GALAXY ULTRA - LSU REC

GALAXY FIT - ELK RIVER HIGH SCHOOL

GALAXY XTREME R - JACKSONVILLE STATE UNIVERSITY

Galaxy® ULTRA

Galaxy® Ultra is a high performing rubber flooring manufactured in a dual-layer format for outstanding durability. The textured top wear layer is durable and provides a slip resistant and safe floor finish satisfying both style and function.

GALAXY® ULTRA BENEFITS

- Durable dual-layer vulcanized rubber floor containing SBR recycled rubber.
- Endures intense use from athletes and engineered to withstand heavy weights and cardio equipment.
- Features anti-microbial/anti-fungal additive to fight the growth of fungus or harmful bacteria.

STANDARD	Tiles + Rolls
STANDARD THICKNESS	3.5, 6, 8, 10 mm
ALSO AVAILABLE	iLock Tiles + Custom logos

Galaxy® FIT

Galaxy® Fit is a rubber floor that not only provides resilience against free weights in strength and conditioning areas, but also brings style and color to the weight room.

GALAXY® FIT BENEFITS

- The surface has a dimpled, “hammer- tone” texture offering a slip resistant, non-porous surface that eliminates odors and hygiene concerns.
- Durable dual-layer vulcanized rubber supports heavy fitness equipment and vigorous use from athletes.
- Material includes recycled rubber tires for LEED credit eligibility.

STANDARD	Tiles + Rolls
STANDARD THICKNESS	3.5, 6, 8, 10 mm
ALSO AVAILABLE	iLock Tiles + Custom logos

Galaxy® XTREME & Galaxy® XTREME R

Galaxy® XTreme & XTremeR are modular tiles or rolls comprised of a thick, unique composite structure that provides durable quality and outstanding wear resistance.

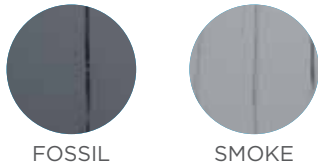

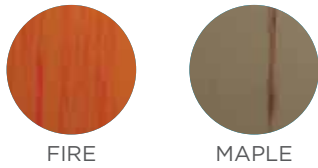

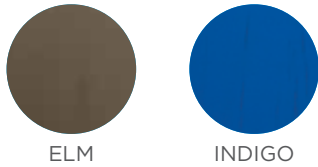

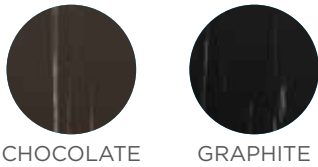

GALAXY® XTREME & XTREME R BENEFITS

- Design provides resiliency and deflection to the athlete during impact that results in less energy return to reduce the risk of athletic fatigue and injury.
- Prefabricated factory molded tile consisting of 100% recycled SBR rubber backing.
- Engineered for superior shock and impact absorption.

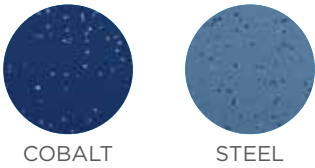

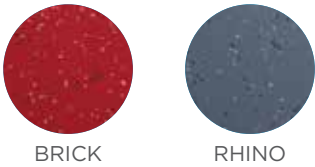

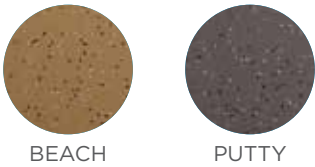

STANDARD TILES	24" x 24" x 1" Tile
STANDARD ROLLS	12, 16, 18, 24 mm

Durathon® & Durathon®
ELITE INFIELD ELITE TRACK

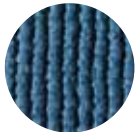

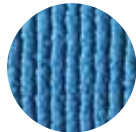

Durathon® Elite offers a dual durometer construction that provides excellent force reduction to prevent long-term micro-injuries while providing superior energy restitution to deliver outstanding athletic performance. It can be installed indoor & outdoor, providing consistent and familiar training surfaces so your athletes can train and compete on a single, fast, and comfortable surface.

DURATHON® ELITE BENEFITS

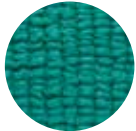

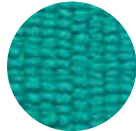

-  Waffle Back design provides resiliency and deflection to the athlete during impact that reduces the risk of athletic fatigue and injury.
-  Durable vulcanized surface provides excellent performance characteristics for spike and non-spike use.
-  Ideal surface friction that protects runner and jogger safety.

Combination and Fusion Floors

Combination floors combine a Pulastic floor over a wood subfloor system for increased floor performance.

Fusion floors allow for the merging of multiple surfaces to come together and create one continuous floor with a seamless transition.

COMBINATION AND FUSION FLOOR BENEFITS

Athletes benefit from the perfect combination of surfaces possessing unmatched safety, comfort, and performance.

Versatility and flexibility for multi-purpose spaces with a variety of sporting activity needs.

Can be customized to meet your facility needs including custom colors and graphic options.

“We have had a good experience with the floor since opening our doors 8 years ago. It’s really easy to maintain and we haven’t had any major issues. And it addressed one of the major things that was important to us - a great floor that’s soft and good for play and doing any type of activity for kids and families.”
